

The Journal of Neuroscience

June 25, 2014 • Volume 34 Number 26 • www.jneurosci.org

Cover legend: Type 1 and Type 2 GABAergic neurons (red) in the posteroventral division of the medial amygdala of a *GAD67-GFP* mouse. The Type 1 cell (bottom) has spiny dendrites and is a projection neuron. The Type 2 cell (top) has a neurogliaform-like morphology with short smooth dendrites and a complex axonal arbor, and it is a local circuit inhibitory interneuron. For more information, see the article by Keshavarzi et al. (pages 8699–8715).
