

The Journal of Neuroscience

September 24, 2014 • Volume 34 Number 39 • www.jneurosci.org

Cover legend: Thalamic axonal arbors from corticothalamic neurons of the primary somatosensory (S1) cortex. Colorized fluorescent image from an *in vitro* slice containing EYFP-expressing corticothalamic fibers originating from a small injection of virus transducing channelrhodopsin2-EYFP into deep S1 cortex. For more details, see the article by Lee et al. (pages 13170–13182).
