February 26, 2014 • Volume 34 Number 9 • www.jneurosci.org

**Cover legend:** Confocal micrograph of a mouse retina showing retinal ganglion cell axons (yellow) exiting the optic nerve head on their way to central targets in the brain. Axons penetrate a dense plexus of astrocytes (blue) that also frame the retinal vasculature. For more information, see the article by Ward et al. (pages 3161–3170).
