

The Journal of Neuroscience

May 6, 2015 • Volume 35 Number 18 • www.jneurosci.org

Cover legend: This image of a coronal section of the dorsal telencephalon from an embryonic day 18.5 mouse shows excitatory neurons of different layers (yellow and red). Haploinsufficiency for *Rbm8a*, a component of the exon junction complex, causes severe microcephaly and defective neurogenesis. For more information, see the article by Mao et al. (pages 7003–7018).
