Cover legend: This figure shows *Importin* $\beta 1$ mRNA granules in spinal cord axons regenerating into an ascending peripheral nerve graft in a rendered *xyz* scan. The green channel shows axons expressing neurofilament and SCG10, the orange channel shows *Importin* $\beta 1$ mRNA in axons, the red channel shows non-neuronal *Importin* $\beta 1$ mRNA, and the blue channel shows Schwann cell nuclei.
