

## Correction

### Correction: Yang et al., Mutant Alpha-Synuclein Causes Age-Dependent Neuropathology in Monkey Brain

In the article “Mutant Alpha-Synuclein Causes Age-Dependent Neuropathology in Monkey Brain” by Weili Yang, Guohao Wang, Chuan-En Wang, Xiangyu Guo, Peng Yin, Jinqian Gao, Zhuchi Tu, Zhengbo Wang, Jing Wu, Xintian Hu, Shihua Li, and Xiao-Jiang Li, which appeared on pages 8345–8358 of the May 27, 2015 issue, images from monkey were mistakenly labeled mouse in Figure 6A. The correct images that were obtained from mouse brains are shown below. Figure legends and description remain the same. This replacement does not affect the interpretation or conclusions of Figure 6.

In addition, the Materials and Methods section states “Viral injection of monkey brains was performed using the facilities at Kunming Institute of Zoology, the Chinese Academy of Sciences, and Kunming Biomed International, Kunming, China.” The correct statement is “Viral injection of monkey brains was performed using the facilities at Kunming Biomed International, Kunming, China.”
