THE JOURNAL OF NEUROSCIENCE

December 2, 2015 • Volume 35 Number 48 • www.jneurosci.org

**Cover legend:** This is a composite image of a rat hippocampal neuron expressing mCherry (red, confocal) and the actin-binding fluorescent peptide LifeAct-Venus (pseudocolors, CW-STED). STED imaging of LifeAct-Venus and *post hoc* deconvolution allows nanoscopic investigations of changes in cytoskeleton organization within dendritic spines. For more information, see the article by Chevy et al. (pages 15772–15786).
