Innovation: Creating the next-generation institute

Aurora Health Care is adding renowned scientific and medical leaders to its team.

- Chief of Neurosurgery
- Cranial Neurosurgical Fellow
- Endovascular Specialist
- 2 Stroke Neurologists
- Complex Cranial Neurosurgeon
- 3 Spinal Neurosurgeons
- Neuromuscular Specialist

Aurora Neuroscience Innovation Institute (ANII), led by Amin Kassam, MD, has undergone a significant transformation at Aurora Health Care over the past 18 months. ANII represents an integrated service line that encompasses Neurology, Endovascular, Neurosurgery, Otolaryngology, Spine and Neuro-Ophthalmology, providing service from the clavicle to the follicle.

ANII has recently designed and built four dedicated avant-garde operating theaters that are at the forefront of technology. They have been the site of numerous technological and surgical “first-in-man” advances, including the integration of an optical surgical robot system for spinal and cranial neurosurgery, as well as head and neck surgery. These advances have not only led to treating patients from around the world, including

the Middle East, Europe and Asia, but also for hosting surgeons from across the globe.

In addition, ANII, in partnership with the Aurora Research Institute, has developed advanced imaging and cell-interrogation facilities. The research laboratory has brought together a talented team of physicians, engineers and basic scientists for the discovery and characterization of progenitor cells and subsequent development of novel therapeutic treatments.

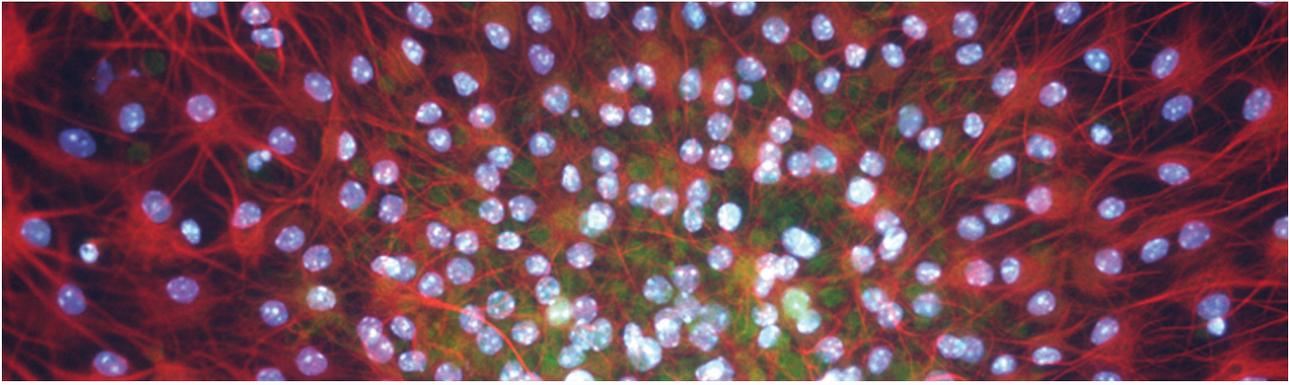

Aurora Health Care is a not-for-profit health care system serving Wisconsin and Northern Illinois with 15 hospitals, more than 150 clinics and 30,000 employees. Aurora has been experiencing significant growth over the past decade, and is now a fully integrated system comprising more than 1,500 employed physicians.
