A GLOBAL FORUM TO ADVANCE DEMENTIA SCIENCE.

JULY 24–28
ANNUAL CONFERENCE
JULY 22–23
PRECONFERENCES
JULY 24–27
EXHIBITS

TORONTO, CANADA

Join international investigators, clinicians and care providers as they gather at AAIC® to share the latest study results, theories and discoveries to drive progress toward methods of treatment, prevention and, ultimately, a cure for Alzheimer’s disease and other dementias.

SUPERIOR Activity Monitoring

Truly POWERFUL Open Field Software

Only for SuperFlex and VersaMax

- Advanced, user-friendly Fusion software for Windows XP/7/8/10, subscription-free
- Flexible zone designer, multi-path activity plotter, velocity tracker & configurable heat mapper with virtually limitless data binning
- Seamless integration of light/dark boxes, place preference chambers, running wheel activity sensors, diet/respiratory monitoring & more

CPP Zone Map  Velocity Tracker  Heat Map

Join us in forging the future of neuroscience

Support a future of discovery and progress through travel awards and public education and outreach programs.

To inquire about specific initiatives or to make a tax-deductible contribution, visit SfN.org or email: development@sfn.org.

Become part of the world’s largest organization of scientists and physicians devoted to understanding the brain and nervous system.

Join now and enjoy exclusive member benefits:

- Reduced fees and advanced registration for Neuroscience 2016
- Online subscription and reduced publication fees for JNeurosci
- Abstract submission eligibility for the annual meeting
- Networking and scientific discussion on Neuronline
- Free online access to the European Journal of Neuroscience
- Premium career services through NeuroJobs
- And more!

The IPA™ combines a low-noise patch clamp amplifier with onboard D/A conversion and data acquisition via high-speed USB into a single integrated system with SutterPatch™, a comprehensive software package. Backed by the support and service you’ve come to expect from Sutter Instrument at an introductory price.

**BENEFITS**
- Fully integrated – ensuring quick and easy setup.
- Optimized for whole-cell patch clamp recordings in tissue slices, adherent or dissociated cells.
- Full computer control provides automated compensation of electrode and whole-cell capacitance.
- Voltage and current clamp capability for complete characterization of cells’ electrical activity.
- SutterPatch™ software excels in comprehensive data management, intuitive navigation and streamlined data analysis.

**NEW**
Integrated Patch Clamp Amplifier and Data Acquisition System

**Neuronline** is SfN's members-only home for learning and discussion.

Don’t wait to advance your career. Visit Neuronline today.

Explore and discuss content featuring the most relevant topics in neuroscience, created and curated by SfN programs and partners.

The Department of Pathology (http://pathology.ucsd.edu) at the University of California San Diego School of Medicine UCSD is committed to academic excellence and diversity within the faculty, staff, and student body and seeks an outstanding Physician Scientist at the Associate or Full Professor level to serve as the Director of Neuropathology.

UCSD has exceptional strengths in a broad array of neurosciences, including aging and degenerative diseases, brain tumor biology, developmental neurobiology, vision research, and diseases of muscle and nerve. The Director of Neuropathology will be expected to build on research excellence in these programs. The future Director will also be expected to lead the clinical activities of Neuropathology, which include intraoperative neurosurgical consultation and permanent section interpretation, molecular neuropathology, muscle and nerve biopsy interpretation, autopsy brain examination and neuropathology consultations. Overseeing teaching of neuropathology to residents, fellows, medical students, and graduate students also is essential.

Candidates must have an MD or MD, PhD degree with board certification in Anatomic Pathology and Neuropathology. Candidates should have a demonstrated track record of scholarly achievement and research excellence, and an interest in further contributing to the exceptional programs in Neurosciences at UCSD through collaboration. Candidates are required to show a demonstrated commitment to diversity and equity by submitting a Diversity Statement of past contributions and/or future plans of excellence in this area as part of their application for an academic appointment.

Appointment will be at the Associate or Full Professor level. Series will include 100% Ladder or 50% Ladder Rank and 50% In-Residence with secured extramural funding. Position is tenured and with partial state funding. Salary is commensurate with qualifications and based on University of California pay scales. Review of applications will begin on May 20, 2016 and continue until the position is filled.

Interested Applicants must submit a CV, a cover letter describing clinical and research interests, names and contact information of three references and a separate statement summarizing past or potential contributions to diversity (For further information about contributions to diversity statements, see http://facultyequity.ucsd.edu/Faculty-Applicant-C2D-Info.asp”). Applications must be submitted through the University of California San Diego’s Academic Personnel RECRUIT system at: http://apptkrkr.com/788936

The University of California is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to gender, race, color, religion, sex, national origin, disability, age or protected veteran status.
The Art of Customer Service

If, for any reason, you are not completely satisfied with your purchase you may return it for a full refund. You deserve the best instruments, the most competitive prices, and you should always be satisfied with your purchase.
One Remarkably Simple Technology

Simplify your research with automatic and continuous dosing. **ALZET® Osmotic Pumps** are a superior alternative to repetitive injections and other dosing methods that require frequent animal handling. These fully implantable pumps provide continuous and precise administration of test agents, in animals as small as mice, for up to six weeks.

Want to see how ALZET Osmotic pumps are used in your field? Contact us to request references from our 16,000+ publication collection.
