

JNeurosci

THE JOURNAL OF NEUROSCIENCE

August 10, 2016 • Volume 36 Number 32 • www.jneurosci.org

Cover legend: Mouse spinal cord (horizontal section) 3 weeks after injury. Iba1+ macrophages (red) accumulate at the lesion and along degenerating rostral sensory tracts. GFAP+ astrocytes (green) form a scar at the border of the lesion. Nuclei are identified by DAPI (blue). For more information, see the article by Gaudet et al. (pages 8516–8532).

8516 miR-155 Deletion in Mice Overcomes Neuron-Intrinsic and Neuron-Extrinsic Barriers to Spinal Cord Repair

Andrew D. Gaudet, Shweta Mandrekar-Colucci, Jodie C.E. Hall, David R. Sweet, Philipp J. Schmitt, Xinyang Xu, Zhen Guan, Xiaokui Mo, Mireia Guerau-de-Arellano, and Phillip G. Popovich

8533 Correction: The article “Segregated Encoding of Reward-Identity and Stimulus-Reward Associations in Human Orbitofrontal Cortex” by Miriam Cornelia Klein-Flügge, Helen Catharine Barron, Kay Henning Brodersen, Raymond J. Dolan, and Timothy Edward John Behrens, appeared on pages 3202–3211 of the February 13, 2013 issue. A correction for this article appears on page 8533.

Persons interested in becoming members of the Society for Neuroscience should contact the Membership Department, Society for Neuroscience, 1121 14th St., NW, Suite 1010, Washington, DC 20005, phone 202-962-4000.

Instructions for Authors are available at <http://www.jneurosci.org/misc/itoa.shtml>. Authors should refer to these Instructions online for recent changes that are made periodically.

Submissions should be submitted online using the following url: <http://jneurosci.msubmit.net>. Please contact the Central Office, via phone, fax, or e-mail with any questions. Our contact information is as follows: phone, 202-962-4000; e-mail, jn@sfn.org.
