Correction

Correction: Salio et al. “Presynaptic Modulation of Spinal Nociceptive Transmission by Glial Cell Line-Derived Neurotrophic Factor (GDNF)”

In the article, “Presynaptic Modulation of Spinal Nociceptive Transmission by Glial Cell Line-Derived Neurotrophic Factor (GDNF)” by Chiara Salio, Francesco Ferrini, Sangu Muthuraju, and Adalberto Merighi, which appeared on pages 13819–13833 of the October 8, 2014 issue, the authors regrettably noticed a typo in Figure 4E where the second bar is referred to IB4+ type Ia glomeruli (not Ib) and a mistake in Figure 12 where the bottom left scheme of a GII glomerulus with GFRα1 receptors have been erroneously depicted on dendrites rather than in the C bouton. These corrections do not affect the conclusions of the paper. Figure 4 and Figure 12 have been corrected on the online PDF version and is displayed below.
