COMPACT, CONVENIENT, COMPLETE
Flexible systems allow subjects to be mobile, remote, and comfortable. Get better data from untethered subjects and easily analyze your data using signal-optimized filters and measurements.

SOPHISTICATED AND STREAMLINED
Set up and start recording in minutes with the easy-to-use AcqKnowledge for Smart Center Wizard, easy device pairing, auto-detection of transmitters, and signal-specific analysis recommendations.

POWER WITH PORTABILITY
In the lab or in the field, the Smart Center delivers powerful data collection, visualization, and analysis for life science research applications.

At Houston Methodist, our doctors are developing a drug that kills tumors deep in the brain while leaving healthy tissue intact. This first-of-its-kind treatment will give patients a more effective, less invasive option for overcoming this serious condition, where currently few solutions exist. As a top hospital for neurological care, we’re constantly innovating new ways to answer medicine’s greatest obstacles.

Visit houstonmethodist.org/ni and explore all the ways we’re leading medicine.

REMOVING A DEADLY BRAIN TUMOR WITHOUT LIFTING A SCALPEL.
**NEW!**

- OPEN DESIGN MICROSCOPE
- IN VIVO AND IN VITRO EXPERIMENTATION
- OCC OR DIC TRANSMITTED LED LIGHT
- EPI-FLUORESCENT IMAGING
- MOTORIZED Z-FOCUS NOISEPIECE

**BOB™ OPEN-DESIGN UPRIGHT MICROSCOPE**

The Sutter BOB – designed to eliminate the conventional microscope frame – is a simple, open-design upright microscope platform ideal for slice electrophysiology, wide-field fluorescent imaging, two-photon imaging, photostimulation and new techniques just being developed!

BDHC and DAB-Co Substrate Kits

Ideal for single and dual-immunolabeling on tissue sections and cells

BDHC Substrate Kit:
A: Blue & particulate BDHC reaction product in acidic condition (pH 6.2).
B,C: Easily distinguished from brown & diffuse reaction product of DAB.

DAB-Co Kit: For single or double labeling immunocytochemistry. Incorporation of cobalt can modify color of normally brown DAB reaction, leading to distinct dark blue/bluish black color.

# The History of Neuroscience in Autobiography

**THE LIVES AND DISCOVERIES OF EMINENT SENIOR NEUROSCIENTISTS CAPTURED IN AUTOBIOGRAPHICAL BOOKS AND VIDEOS**

**The History of Neuroscience in Autobiography Series**
*Edited by Larry R. Squire*

Outstanding neuroscientists tell the stories of their scientific work in this fascinating series of autobiographical essays. Within their writings, they discuss major events that shaped their discoveries and their influences, as well as people who inspired them and helped shape their careers as neuroscientists.

**Autobiographical Video** *(Available in DVD Format)*

PBS personality Richard Thomas interviews eminent senior neuroscientists who reflect upon their lives, their dreams, and their work, and share their insights on what’s ahead in the field of neuroscience.

---

**SFN’s History of Neuroscience in Autobiography video and book collections are freely available at sfn.org/history**
Cell survival rates are critical to the success and reliability of your neurobiology research. The Gibco™ B-27™ Plus Neuronal Culture System helps improve the reliability of your experiments by increasing the survival of neurons by more than 50%—the highest in the industry.

Increase neuronal cell survival by more than 50% with the new Gibco B-27 Plus Neuronal Culture System

Cell survival rates are critical to the success and reliability of your neurobiology research. The Gibco™ B-27™ Plus Neuronal Culture System helps improve the reliability of your experiments by increasing the survival of neurons by more than 50%—the highest in the industry.

Postdoctoral Associate
Anesthesiology

Required Qualifications: (As Evidenced by an Attached Resume)
Doctoral Degree or foreign equivalent degree. Experience in drosophila research.

Preferred Qualifications: PhD in Neuroscience

Brief Description of Duties:
The Postdoctoral Associate will assist the Principal Investigator in the Department of Anesthesiology. The incumbent will conduct research and ensure that all experiments are appropriately conducted following the policies and procedures of Stony Brook University.

Within the predetermined research scope and methodology, conduct research experiments in the field of Neuroscience.

• Collect and analyze data, including periodical/literature search and utilizing specialized skills in related field to analyze the collected data.
• Participate/assist in manuscript writing for publication in scientific journals and/or presentations. May also assist in grant writing.
• Lab maintenance, including equipment maintenance and ordering of supplies as needed.
• Other duties as assigned, which may include attending Scientific Conferences and Meetings.

Special Notes:
FLSA Exempt position, not eligible for the overtime provisions of the FLSA. Minimum salary threshold must be met to maintain FLSA exemption

Stony Brook University is 100% tobacco-free starting January 1, 2016. See our policy and learn more at stonybrook.edu/tobaccofree.

About Stony Brook:
Long Island's premier academic medical center, Stony Brook Medicine represents Stony Brook University's entire medical enterprise and integrates all of Stony Brook’s health-related initiatives: education, research and patient care. It encompasses Stony Brook University Hospital, Stony Brook Children’s Hospital, the six Health Sciences schools — Dental Medicine, Health Technology and Management, Pharmaceutical Sciences, Medicine, Nursing and Social Welfare — as well as the major centers and institutes, programs and more than 50 community-based healthcare settings throughout Suffolk County. With 603 beds, Stony Brook University Hospital serves as Suffolk County’s only tertiary care center and Regional Trauma Center. Stony Brook Children’s, with more than 160 pediatric specialists, offers the most advanced pediatric specialty care in the region.

If you need a disability related accommodation, please call the University Human Resource Services Department at (631) 632-6161 or the University Hospital Human Resources Department at (631) 444-4700. In accordance with the Title II Crime Awareness and Security Act, a copy of our crime statistics is available upon request by calling (631) 632-6350. It can also be viewed on line at the University Police website at http://www.stonybrook.edu/police

For a full position description, or to apply online, visit: www.stonybrook.edu/jobs (Req. # 1702897)

Equal Opportunity Employer, females, minorities, disabled, veterans
# The 41st Annual Meeting of the Japan Neuroscience Society

**Theme:**
New horizon of neuroscience

**Dates:** July 26 (Thu) - 29 (Sun), 2018  
**Venue:** Kobe Convention Center  
(Kobe International Conference Center, Kobe International Exhibition Hall)

**President:** Hitoshi Okazawa  
(Department of Neuropathology, Tokyo Medical and Dental University)

Find Your Way to the APS Booth #3322
We’ll make it worth your while!

PREVIEW THE NEW JN SITE
Sunday, November 12, 1–2 pm
Be among the first to get a peek at the new jn.physiology.org, launching in 2018. Stay for refreshments and a demo, and learn how the new streamlined platform will make finding the articles you need faster and easier. Don’t forget to add your name to the drawing for an Amazon Echo.

APPLY FOR AN APS MEMBERSHIP
Register at the booth, or online with the code SFN17, and become a member. Staff will be on hand to help with the process and answer any questions.

FREE Journals and Refreshments!

MEET JN’S EDITORS
Meet the JN editorial staff and learn how to submit your work to the Journal of Neurophysiology. Editor-in-Chief Bill Yates and associate editors will be available to answer your questions throughout the conference.

Use code SFN17 and receive a FREE GIFT!

**Novel rat monoclonal antibody against P2RY12 for specific detection and isolation of microglia**

**Date:** Monday, November 13  
**Time:** 3:30 - 3:45 pm  
**Room:** 146C

**Presenter:** Anna Cartier, Ph.D.  
**Product Manager, Neuroscience**

P2RY12, a selective marker for microglia (Clone S16007D) is uniquely expressed in resident brain microglia, distinguishing these cells from other myeloid cells. This clone is specific for murine P2RY12 and suitable for IHC, IF and flow cytometry.

Learn more at:  
[biologend.com/neuroscience](http://biologend.com/neuroscience)

IF staining of purified anti-P2RY12 antibody (clone S16007D) on PFA-fixed frozen mouse brain tissue.
