NEW! Low-Noise Ultra-Fast Digital Patch Clamp Amplifier System

- Integrated data acquisition interface
- High bandwidth for fastest signal characterization
- Single-channel and whole-cell patch clamp recordings
- Digital compensation circuitry for precision and signal fidelity
- Quick and easy setup
- Bundled SutterPatch® software built on Igor Pro platform

dPatch®

The next generation Digital Patch Clamp Amplifier System. Combining high-speed, high-resolution digital processing, precision A/D circuitry, integrated data acquisition and bundled SutterPatch® software, the dPatch system provides capabilities previously out of reach for the electrophysiologist. Available in either a single- or double-headstage configuration, the dPatch meets the requirements of today's experiments and anticipates the demands of tomorrow's.

Automatic Membership Renewal Now Available

Sign Up for Automatic Membership Renewal

- **Save time** — Lessen your to-do list
- **Go green** — Eliminate paper invoices and their impact on the environment
- **Uninterrupted membership** — Never miss an issue of *The Journal of Neuroscience* or any of your valuable member benefits
- **Bonus Day** — Ensure access to your choice of prime housing for the annual meeting before the opening of advance member registration
- **Support the field** — Know your dues enhance professional development initiatives, public outreach, advocacy, and more
