

# Erratum

## **Erratum: Li et al., “Reason’s Enemy is Not Emotion: Engagement of Cognitive Control Networks Explains Biases in Gain/Loss Framing”**

In the article “Reason’s Enemy Is Not Emotion: Engagement of Cognitive Control Networks Explains Biases in Gain/Loss Framing” by Rosa Li, David V. Smith, John A. Clithero, Vinod Venkatraman, R. McKell Carter, and Scott A. Huettel, which was published in the March 29, 2017 issue on pages 3588–3598, the authors would like to correct the labeling of the MNI coordinates on page 3592 in column 1. The coordinates should read as  $[-22, -6, -18]$ . All conclusions of the manuscript were correct as reported. The authors regret the error, and this has been updated online.
