NEW! Stainless Steel 3-axis Micromanipulator

- Mechanically robust construction
- Precision cross-roller bearings
- 25 mm orthogonal travel in X, Y, and Z
- Carries up to a kilogram
- Suited for in vitro and in vivo recording
- Universal mounting system for headstage or pipette holder

TRIO™ MP-845S

The MP-845 manipulator is now also available in stainless steel! The standard version of the MP-845 has virtually no drift in its motor and bearing assemblies. By utilizing a stainless steel with very low coefficient of expansion, the MP-845S is simply the lowest drift manipulator available on the market. The added mass of the stainless steel body has the additional benefit of dampening out vibration, giving the stainless MP-845S the silkiest movement of any manipulator.
