SOME PEOPLE SEE THE AURORA BOREALIS

We see increased neural activity in the occipito-temporal region of the brain.

OUR MINDS ARE ALWAYS ON BRAINS. The Society for Neuroscience is nearly 37,000 like-minded scientists and physicians devoted to understanding the brain and nervous system. We make discovery possible by fueling collaboration and the exchange of ideas between neuroscience professionals in different sub-specialties all around the world.

One and done

ALZET® Osmotic Pumps are small infusion pumps inserted at the beginning of your study and then, that’s it. There’s no dosing schedule. No repeated injections. Just a continuous, predictable release of your test agent for the entire study. Days. Nights. Even weekends. Anywhere from one day to six weeks. With no external connections to monitor and less need for handling, it’s less stress for you and your lab animals. Learn more about ALZET Osmotic Pumps and just how needless injections can be at alzet.com/NoMoreNeedles.
